

In over 10 Billion Installations, MATHread:

- Fixed Cross-Threading – It Never Cross-Threads
- Eased Every Assembly – Installers Say It “Glides” In
- Aligned Components – Finds Holes and Forces Itself Straight
- Fixed Clogged Internal threads – Slides Through Paint Build-Ups

MATHread Technology Makes Every Job User-Friendly!

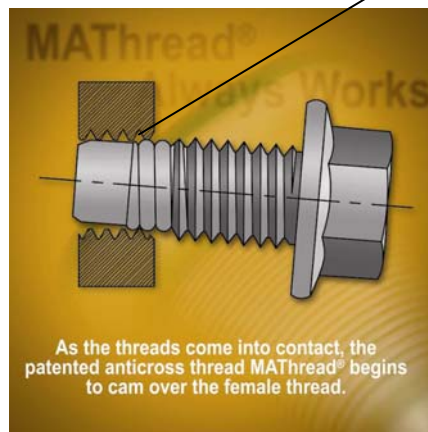

Here's How it Functions...

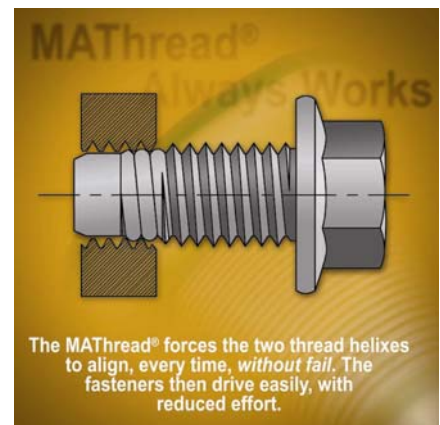

Axis Misalignment

Threads Cam Into Alignment

Threads Drive Normally

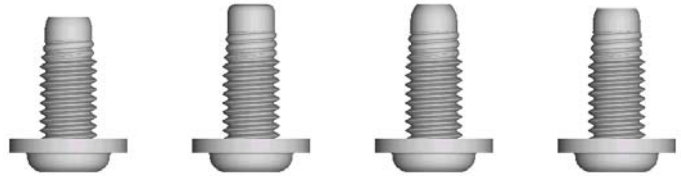

The MATHread Always Works...

Superior Performance Features:

- The Most Versatile Anti-Cross Thread Product :

Some of the Many Available Styles

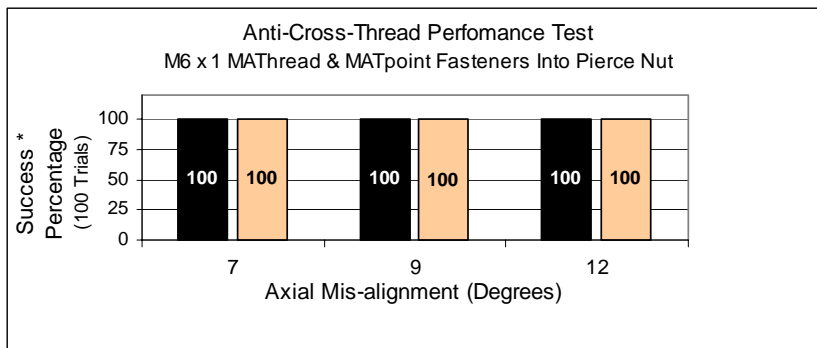

MATpoint

MATHread
Dog point

MATHread
P Point

MATHread
Radiused Point

- Works With All Types of Nuts & Internal Threads – Including Lock Nuts
- Unmatched Anti-Cross-thread Performance

Typical test data is shown, we invite you to visit our lab and verify this data by running the parts yourself!

- Unaffected by Paint in Internal Threads Eliminating the Need for 'Paint-Cutters' and Paint Cutting Features

Specifications:

- Sizes: M3 - M18 #4 - 5/8"
- Lengths: Up to 140mm Up to 5-1/2"
- Head Styles: All , including Double Ended Studs & Cold Formed Specials
- Finishes: All Commercially Available Finishes
- Materials: Carbon Steel & Alloy Steels, Stainless Steel, Brass, Copper

* Other Sizes and Materials Available Upon Request
